New York Stock Market

New York, July 9.—The placid indifference shown in the stock market recently to accumulating bearish influence was less noticeable to-day, and mevements of stocks were more nearly in accordance with the trend of Speculative sentiment. Quotations turned definitely downward during the morning trading. The volume of business inoreased on the down grade and more shares changed hands in the first two hours than during the entire session yesterday. The market hardened during the afternoon and some stocks scored full recoveries, but most of the active shares showed slight net losses.

Canadian Pacific was the particular point of weakness. It fell 5½ points to 203½ on unusually heavy trading. It touched a new low figure for the year, which brought it sold in January. Foreign selling was largely responsible for the break, although rumors of a forthcoming of a \$60,000,000 stock issue played a part in influencing trading. Fully 10,000 shares were disposed of for London account, and there was selling here by Canadian houses. Official denial of rumors of a new stock issue checked the decline, although only a small part of the loss was recevered. Hear traders used the weakness of Canadian Pacific as an entering wedge and succeeded in making headway in all quarters. They were aided by liquidation of long stock much of which was said to be for Pittsburgh's necount.

stock much of which was said to be for Pittsburgh's account.

Although the monthly report of the capper producers with its snowing of a decrease in stocks on hand of 14,550,000 pounds, was a more favorable one than had been generally expected, it found little reflection in the stock market.

The government crop was received with a similar degree of apathy. Although a marked falling off in condition and contraction in indicated yield for the wheat crop was shown, stocks of the grain-carrying railroads moved slightly higher during the brief interval between publication of the report and the close of the market. Government bonds continued to decline. The 2s soid at 28% and the bid price later was reduced to 98, a decline of a point. At private sales 190,999 of these bords went at 98, and another such 100,990 was chered at 972, with no takers, the best offer for the block being 5. United States 3s and Panama 3s declined 49, and the 44 4 on call.

The bond market continued to display lack. te 1, on call.

The bond market continued to display lack of support with the Harriman Issues proniinent in the trading.

New York, July 2-Money on call steady, 1874 per cent, last loan, 2½; clesing bid, 2½; offered at 2½. Time loans, strong; sixty days 363% per cent inhety days 4745, six months, 52,66. Frime mercantile paper, 6 per cent. Sterling exchange firm with actual business in bankers' bills at 48,826 for sixty lay bils and at \$4,820 for demand. Commerdiis, 54,524. Har silver, 585%. Mexican dellars, 16. Government bonds weak; raliroad bonds reavy.

from local bulls or trade sources. Continued hot dry weather in the South increasing talk of insect damage to the new crep and further shipments from the local stock were the features. Cables were better than due and the market opened steady at an advance of 41s points on a renewal of vesterials buying movement. After showing a net gain of about vall points prices reacted under realizing and the market also seemed to be meeting some scattering pressure from houses with Southern connection. The character of the latter selling naturally suggested that the crep was making progress, but the day's weather reports axial showed very high temperatures in the Southwest with thirteen stations in the Houston district reporting 100 degrees ar ever, and prices frimed up again in the early afternoon.

was more active in the last hour than at any time during the day, and closing prices were within a point or two of the best at a net advance of 11d15 points. Wall Street interests were credited with buying on the advance, and houses with Liverpool connections were buyers of early new crop months during the morning. Reports reaching here from Texas claim that boll weevil are threatening more damage to the cotton crop this season than at any time for the past four years, and while some authorities claim that the prevailing weather conditions are favorable in the main the strengthening condition of the old crop is supposed to emphasize any suggestion of new crop damage.

Cordova, 13/16/4c. nominal: Havre, 3/634,
Irain lower. Potatoes—Firm. Long Island,
barrel, \$1/50/2,12. Cabbages—Steady and unchanged. Peanuts and Freights—Steady and
unchanged.

unchanged.
Cottonseed oil was firmer on the inherent strength of the cash position, together with room covering in new crops, induced by the advance in cotton and scarcity of offerings. Tentiers of about 2.000 barrels on July contracts had no effect on the market, which closed 2.54 points net higher with sales of 1.500 barrels. Frime crude, nominal, prime summer yellow, 84, 680, July, 848, August, 842. September, 841, October, 7.56, November, 662, December, 843, January, 643, February, 840, prime whiter yellow and prime summer white, 5.75 bid.

MISCELLANEOUS MARKETS.

DRY GOODS MARKETS.

New York, July 2.—Cotton goods markets are steady with trade moderately active in the wash goods division. Cotton yarns are quiet, with prices firm. Wersted yarns spinners are turning down bids that are too low. Some leading men's wear lines will be opened for spring next week. Burlaps are steady.

given, as well as the first idea of the size of the potota, tobacco and rice Details of the acreage condition, on
